## READ CAREFULLY AND KEEP FOR FUTURE REFERENCE

**This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children unless they are older than 8 and supervised. Keep the appliance and its cord out of the reach of children aged less than 8 years.**

**Children shall not play with the appliance.**

**Never use a power base other than the one supplied with the appliance.**

**Never fill the kettle above the MAX marking. If the kettle is overfilled, boiling water may be ejected.**

**If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.**

- ⚠ This appliance generates heat during use. Adequate precaution must be taken to prevent the risk of burns, scalds, fires or other damage to persons or property caused by touching the exterior whilst in use or during cooling.
- ⚠ Never use this appliance for anything other than its intended use. This appliance is for household use only. Do not use this appliance outdoors.
- ⚠ Always ensure that hands are dry before handling the plug or switching on the appliance.
- ⚠ Always use the appliance on a stable, secure, dry and level surface.
- ⚠ This appliance must not be placed on or near any potentially hot surfaces (such as a gas or electric hob).
- ⚠ Do not use the appliance if it has been dropped, if there are any visible signs of damage or if it is leaking.
- ⚠ Ensure the appliance is switched off and unplugged from the supply socket after use and before cleaning.
- ⚠ Always allow the appliance to cool before cleaning or storing.
- ⚠ Never immerse any part of the appliance or power cord and plug in water or any other liquid.
- ⚠ Never let the power cord hang over the edge of a worktop, touch hot surfaces or become knotted, trapped or pinched.
- ⚠ Never leave the appliance unattended when in use.
- ⚠ Beware of steam coming from the spout or lid especially during refilling. Never open the lid during the boiling cycle.
- ⚠ Never fill the appliance when it is positioned on the power base.
- ⚠ Never use the kettle without sufficient water in the kettle for it to operate correctly.
- ⚠ Never allow the appliance to boil dry.

- 4 Lid
- 5 Lid release button
- 6 BOIL button
- 7 KEEP WARM button
- 8 Display
- 9 START button
- 10 TEMPERATURE SELECT button

Due to our policy of continuous improvement, the actual product may differ slightly from the one illustrated in these instructions.

**▲ If this kettle is filled above the maximum level mark, hot water may be ejected from the spout during boiling. Beware of steam coming from the spout or lid especially during refilling. Never open the lid when the kettle is boiling.**

## Before first use

Remove any packaging and promotional material from your kettle and position it on a stable, secure, dry and level work surface away from the edge.

Before connecting to a power source, make sure your mains supply voltage is the same as the one indicated on the appliance. Connect the plug to a suitable power outlet and make sure that the power cord does not overhang the work surface. Excess power cord can be stored in the power base.

Remove your kettle from the power base. Fill your kettle to the maximum mark and close the lid.

Place your kettle back onto the power base. Press the BOIL button, allow it to boil then discard the water. Repeat twice. This will remove any residue left over from the manufacturing process.

## Boiling water

1. Remove your kettle from the power base and fill it with water. You can fill it through the spout or by opening the lid. Don't overfill your kettle and always ensure that there is sufficient water in your kettle for it to operate correctly. This is approximately 250ml or 1 teacup full. Place your kettle back onto the power base. Always check the water level when your kettle is positioned on its power base. **Note** Whenever you remove the kettle from the power base the display will show ---. This is normal.
2. Press the BOIL button. The BOIL button will flash and the kettle will start to boil the water. The temperature display will show the temperature of the water in 5°C steps as it is heated up.
3. Once boiled, your kettle will make a sound and automatically switch off. All lights will go out except the display which will continue to show the current temperature of the water in 1°C steps until the temperature has fallen to 80°C.
4. To stop the kettle at any time press the BOIL button.

## Heating water to a selected temperature

Your kettle will heat water to one of four user-selected temperatures (60°C, 70°C, 80°C or 90°C). Note that your kettle can only heat water up and not cool it down so if you select a temperature of 70°C and the water in your kettle is already hotter, nothing will happen.

1. Fill your kettle with water as required then place it onto the power base.
2. Press the TEMPERATURE SELECT button to select the desired water temperature (60°C, 70°C, 80°C or 90°C). The temperature changes with each press of the button as follows: 60, 70, 80, 90, 60, 70, 80, 90, etc.

# using your kettle

---

3. Press the START button. The START button will flash and the water will be heated to the selected temperature. The temperature display will show the temperature of the water in 5°C steps as it is heated up.
4. When the selected temperature is reached, your kettle will make a sound and automatically switch off. All lights will go out except the display which will continue to show the current temperature of the water in 1°C steps until it has fallen by 20°C below the temperature you selected.
5. To stop the kettle at any time press the START button.

## Keep Warm feature

The keep warm feature will maintain the temperature of the water at 70°C for 10 minutes. To activate the keep warm feature press the KEEP WARM button. The button will flash when your kettle is in the keep warm mode. To switch off the keep warm mode, press the KEEP WARM button again.

## Standby mode

Your kettle will enter standby mode to conserve power under the following conditions:

- If you have been heating water and the water temperature has fallen by over 20°C after heating.
- After 10 seconds of inactivity (no button has been pressed).

To reactivate your kettle, simply operate it as normal. For example, press the BOIL button and your kettle will immediately start to boil the water.

## Sounds

The sounds your kettle makes can be turned on or off as preferred. To turn them off, press and hold the TEMPERATURE button then press the BOIL button. The display will briefly show OFF. To turn the sounds back on, press and hold the TEMPERATURE button then press the BOIL button. The display will briefly show ON.

## Boil dry protection

If your kettle is operated with insufficient water a built in fail-safe device will automatically switch it off. Should this happen, the display will flash *BBB* and the buttons will also flash.

- Unplug your kettle and allow it to cool. When it has cooled down sufficiently the safety device will reset itself.
- Once the safety device has reset, refill your kettle with cold water and use it as normal.

**⚠ Always unplug the kettle from the mains supply socket and allow it to completely cool down before cleaning or descaling it. Do not immerse the kettle, power base or power cord and plug in water or any other liquid.**

1. Clean the exterior surface of the kettle with a damp cloth and then polish with a soft dry cloth. Do not use steel wool pads or harsh/abrasive cleaners.
2. Descal your kettle regularly to keep it working efficiently. Use a proprietary descaling product following the manufacturer's instructions carefully.

## **Cleaning the filter**

**⚠ Before removing or refitting the filter, switch off the kettle and empty it. Allow it to cool completely, then unplug the power base from the mains supply socket. Never operate the kettle without the filter fitted.**

- Open the lid and remove the filter from behind the spout.
- Rinse the filter under a tap whilst brushing it with a soft brush.
- In hard water areas it may be necessary to descale the filter using a descaling product. Use a proprietary descaling product following the manufacturer's instructions carefully.
- The filter may be washed safely in the cutlery rack of a dishwasher.
- Refit the filter back into your kettle.

# connection to the mains supply

---

## **⚠ This appliance must be earthed.**

This appliance is fitted with either a moulded or rewirable BS1363, 13 amp plug. The fuse should be rated at 13 amps and be ASTA approved to BS1362.

If the fuse in a moulded plug needs to be changed, the fuse cover must be refitted. The appliance must not be used without the fuse cover fitted.

If the plug is unsuitable, it should be dismantled and removed from the supply cord and an appropriate plug fitted as detailed below. If you remove the plug it must not be connected to a 13 amp socket and the plug must be disposed of immediately.

The wires of the mains lead are coloured in accordance with the following code:

GREEN/YELLOW = EARTH      BLUE = NEUTRAL      BROWN = LIVE

The wire which is coloured GREEN/YELLOW must be connected to the terminal in your plug which is marked with an E or by the earth symbol ( $\perp$ ) or coloured GREEN or GREEN /YELLOW.

The wire which is coloured BLUE must be connected to the terminal in your plug which is marked with the letter N or coloured BLACK.

The wire which is coloured BROWN must be connected to the terminal in your plug which is marked with the letter L or coloured RED.

If any other plug is used, a 13 amp fuse must be fitted either in the plug or adaptor or at the distributor board.

These appliances are built to the very highest of standards. There are no user serviceable parts. Follow these steps if the unit fails to operate:

1. Check the instructions have been followed correctly.
2. Check that the fuse has not blown.
3. Check that the mains supply is functional.

If the appliance will still not operate, return the appliance to the place it was purchased for a replacement. To return the appliance to the Customer Service Department, follow the steps below:

1. Pack it carefully (preferably in the original carton). Ensure the unit is clean.
2. Enclose your name and address and quote the model number (located on the rating label) on all correspondence.
3. Give the reason why you are returning it.
4. If within the guarantee period, state when and where it was purchased and include proof of purchase (e.g. till receipt).
5. Send it to our Customer Service Department at the address below:

# guarantee

---

Please keep your receipt as this will be required for any claims under this guarantee.

This appliance is guaranteed for 1 year after your purchase as described in this document.

During this guaranteed period, if in the unlikely event the appliance no longer functions due to a design or manufacturing fault, please take it back to the place of purchase, with your till receipt and a copy of this guarantee.

The rights and benefits under this guarantee are additional to your statutory rights, which are not affected by this guarantee. Only Jarden Consumer Solutions (Europe) Limited (“JCS (Europe)”) has the right to change these terms.

JCS (Europe) undertakes within the guarantee period to repair or replace the appliance, or any part of appliance found to be not working properly free of charge provided that:

- you promptly notify the place of purchase or JCS (Europe) of the problem; and
- the appliance has not been altered in any way or subjected to damage, misuse, abuse, repair or alteration by a person other than a person authorised by JCS (Europe).

Faults that occur through improper use, damage, abuse, use with incorrect voltage, acts of nature, events beyond the control of JCS (Europe), repair or alteration by a person other than a person authorised by JCS (Europe) or failure to follow instructions for use are not covered by this guarantee. Additionally, normal wear and tear, including, but not limited to, minor discoloration and scratches are not covered by this guarantee.

The rights under this guarantee shall only apply to the original purchaser and shall not extend to commercial or communal use.

If your appliance includes a country-specific guarantee or warranty insert please refer to the terms and conditions of such guarantee or warranty in place of this guarantee or contact your local authorized dealer for more information.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. E-mail us at [enquiriesEurope@jardencs.com](mailto:enquiriesEurope@jardencs.com) for further recycling and WEEE information.
