

QUICK START

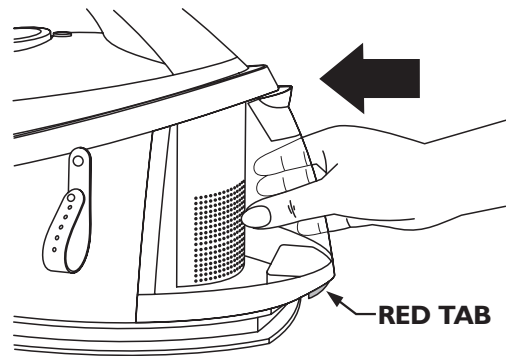

Please refer to the instruction booklet for more detailed information

Breville

FILLING

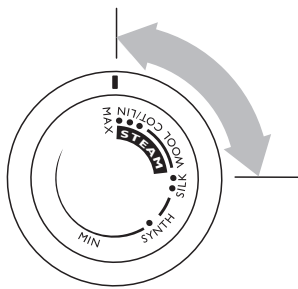

Press the red tab under the tank and slide the tank out. Fill it with water up to the **MAX** mark.

Slide the tank back in until it clicks. When the tank is correctly fitted, the red tab will show.

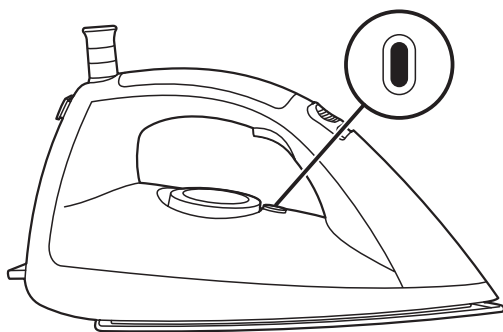

IRONING WITH STEAM

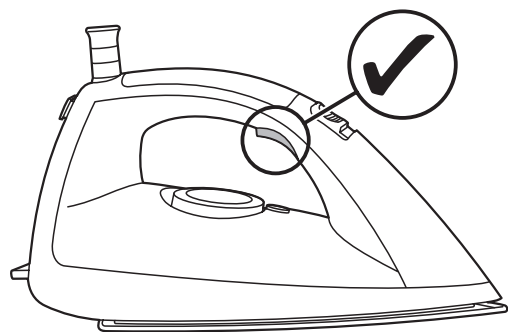

Turn the temperature control to the desired heat setting. For steam ironing, this **MUST** be between ●● and **MAX** otherwise water will drip from the soleplate during ironing.

Turn the steam control to select the desired amount of steam. Turn it anticlockwise to decrease and clockwise to increase the amount of steam.

Wait until the temperature indicator light goes **OUT**. Your iron is now at the correct temperature to use.

Press the steam trigger when steam is needed.

IRONING WITHOUT STEAM

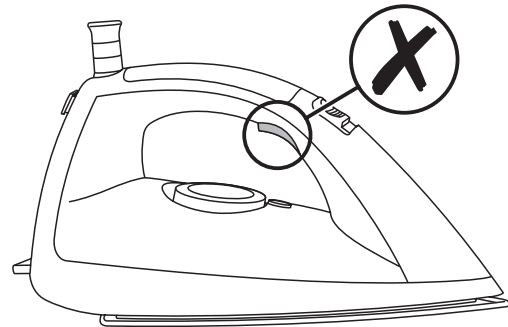

Turn the temperature control to the desired heat setting.

Turn the steam control anticlockwise to the OFF position. If you don't do this, water can drip from the soleplate during ironing.

Wait until the temperature indicator light goes **OUT**. Your iron is now at the correct temperature to use.

Iron **WITHOUT** pressing the steam trigger.

TROUBLESHOOTING

No steam	<ul style="list-style-type: none">Check that there is water in the tankCheck that the water tank is fitted correctly (e.g. is the red tab visible?)Check that the steam control is not set to OFFCheck that the iron is up to temperature (the temperature indicator light is OUT)
Water drips from the soleplate during steam ironing	<ul style="list-style-type: none">Check that the temperature control is between ●● and MAXCheck that the iron is up to temperature (the temperature indicator light is OUT)
Water drips from the soleplate during dry (no steam) ironing	<ul style="list-style-type: none">Check that the steam control is set fully anticlockwise to OFFDon't press the steam trigger during ironing
